

BelTek Named as EMJ's 2005 and 2006 Canadian Partner of the Year

April 23, 2007 9:00AM Eastern Time

Boston – (BUSINESS WIRE) April 23, 2007--BelTek Systems Design Inc., a leader in Mobility Solutions for Business featuring route accounting, direct store delivery (DSD) and field service solutions, announced their Partner of the Year Award from EMJ, a Technology Solutions Division of SYNnex Canada Limited. BelTek was honored with this award in 2004, 2005 and now for 2006.

"BelTek Systems Design is very pleased to be receiving this award for the third consecutive year," said Michel Belzile, BelTek Chief Executive Officer. "BelTek remains intently focused on providing superior technology and service to our customers and EMJ shares our values in providing leading products and services to the marketplace."

"EMJ is proud to be a partner with BelTek as they continue to succeed in the market," offered Marlene O'Grady, Vice President of Sales for EMJ. "With 17 years of experience in the industry, BelTek is well positioned to maximize the huge potential in multiple vertical markets requiring their services."

The mobile solution market is undergoing rapid maturation as handheld devices move into common usage as consumer items. The handheld environment is no longer a niche world but is driving the demand for direct sales delivery and field mobility. BelTek is proactively helping customers overcome the complexities of stretching the mobile environment to its limits to deliver the latest in real time business technologies. Previously considered simply an electronic paper replacement system, sophisticated handheld technology is now a tool to grow sales, improve customer service and eliminate errors and loss.

"BelTek's Route Assistant®, Route Administrator® and T-Server!® deliver on the promise of providing immediate and substantial operating savings that impact the bottom line of our customers," added Michel Belzile, CEO, "This award is another validation of BelTek's continued growth and success in the direct sales delivery, route accounting and field service solutions industry."
