

BelTek Systems Design Inc. Announces Launch of Inaugural North America User Conference

Ignition! 2007, BelTek's North American Regional User Conference, will host customers and partners to two days of interactive sessions and learning modules

Boston – (BUSINESS WIRE) October 3, 2007 - BelTek Systems Design Inc., a leader in Mobility Solutions for Business featuring direct store delivery (DSD), field service solutions and route accounting, announced the launch of the North America Regional User Conference, *Ignition! 2007*. The conference will be held November 14 -16, 2007 in Scottsdale, Arizona.

The focus of this event is on both customers and partners with the expressed objective to promote a strong community of BelTek's software suite users and partners. As a natural progression starting from BelTek's Customer Advisory Board, BelTek is committed to listening to all stake holders while providing forums for learning more about the market and technology and sharing common business experiences.

"BelTek is a hands-on professional organization that takes the time to listen to their customer and partner needs," said Marc Fontaine, Director Information Systems, Arctic Glacier Inc., "The Customer Advisory Board wholly endorses this conference and I am looking forward to meeting with other BelTek software suite users and BelTek partners. The community experience alone for this event is well worth attending."

The conference will also house an optional 4 day concentrated 'BootCamp' training session with separate tracks for customers and partners. The BootCamp offers students a complete learning segment from software set up to reproducing the steps of a day in life of a route driver. Route Assistant®, Route Administrator® and T-Server!® are designed to meet the business processes of a company unlike other solutions that require the business to change their processes to work within the software programmed functions. With over 50 modules and numerous definable screens and menus, the system is highly flexible and customizable. This course gives participants in-depth knowledge and training to become resident experts thereby allowing them to better tailor the solution to meet their specific needs and maximize their investment.

"We are very excited about this event as it extends our resources and expertise to our customers and partners in a great venue and face-to-face environment." offered Michel Belzile, BelTek Founder and Chief Executive Officer, "I am personally looking forward to opening the conference, welcoming our guests and speaking with each of them one-on-one. By taking the time to hear from our customers and partners, it helps us continue to build and deploy superior products and services. This is one event not to be missed."

The BelTek *Ignition! 2007* North America User Conference will be held in Scottsdale, Arizona November 14 – 16, 2007 with an optional BootCamp training course spanning over November 12 – 16, 2007. For more information please contact 1-800-493-6903.
